

Just Talk

An opportunity to share visions on our common World

We want to invite all UNIFE PhD students to talk about things that are happening on our common world, beyond our research activities, which will make our experience at the university more significant for understanding the challenges of our times. That's why we call this "Just Talk" in a way to emphasize the idea of free and open sharing of ideas.

This will be the first of these informal meetings, organized with the specific aim of creating new opportunities for UNIFE PhD students to meet each other. After a 10-minute presentation, given by our speakers, there will be an open discussion about the main topic or others introduced by the audience. The meeting will last between 1 -1,5 hour.
