

AFTER THE DAMAGES

International Summer School

After the Damages is an advanced training project to highlight recent innovations and advancements made in the post-disaster management.

The course will provide the most up-to-date skills to enable participants to play a proactive role in disaster risk management and respond effectively when calamitous events occur.

In these challenging times, as the coronavirus outbreak represents an unprecedented trial on public health around the globe, new leadership practice should draw on wisdom from former experiences while learning, in real time, lessons from today, prioritizing action and thereby better serving the communities.

The *After the Damages* project offers a two-week high-level training/practice course addressing the participation of public administrations managers, competent government agencies representatives, international organizations, researchers and specialists in the fields of architecture, engineering, and earth science.

WHEN

5th to 20th July 2021

HOW

Lectures and educational activities will be held either frontally or in a synchronic, or asynchronous format and virtual thematic fieldwork visits

OPERATIONAL HEADQUARTERS

Department of Architecture, University of Ferrara
via della Ghiara 36 · 44121 · Ferrara · Italy
