

CONCORSO PUBBLICO, PER TITOLI ED ESAMI, PER LA COPERTURA DI N. 2 POSTI DI CATEGORIA C - POSIZIONE ECONOMICA C1, AREA BIBLIOTECHE PER L'UFFICIO BIBLIOMETRICO E BANCHE DATI

Prova orale

GRUPPO 1

- a. Descrivere cos'è il processo di Valutazione della Qualità della Ricerca (VQR);
- b. Descrivere cosa sono le Licenze Creative Commons (CC licences);
- c. Descrivere cos'è WOS;
- d. INGLESE (leggere e tradurre il seguente brano): What is Creative Commons and what do you do? Creative Commons is a global nonprofit organization that enables sharing and reuse of creativity and knowledge through the provision of free legal tools. Our legal tools help those who want to encourage reuse of their works by offering them for use under generous, standardized terms; those who want to make creative uses of works; and those who want to benefit from this symbiosis. Our vision is to help others realize the full potential of the internet. CC has affiliates all over the world who help ensure our licenses work internationally and who raise awareness of our work.

GRUPPO 2

- a. Descrivere cos'è il processo di Valutazione della Qualità della Ricerca (VQR);
- b. Descrivere cos'è l'Abilitazione Scientifica Nazionale (ASN);
- c. Descrivere cos'è SCOPUS;
- d. INGLESE (leggere e tradurre il seguente brano): Is Creative Commons against copyright? Absolutely not. CC has responded to claims to the contrary. CC licenses are copyright licenses, and depend on the existence of copyright to work. CC licenses are legal tools that creators and other rights holders can use to offer certain usage rights to the public, while reserving other rights. Those who want to make their work available to the public for limited kinds of uses while preserving their copyright may want to consider using CC licenses. Others who want to reserve all of their rights under copyright law should not use CC licenses.

GRUPPO 3

- a. Descrivere cos'è il processo di Valutazione della Qualità della Ricerca (VQR);
- b. Descrivere cos'è ACNP;
- c. Quali sono gli indicatori bibliometrici utilizzati per l'Abilitazione Scientifica Nazionale (ASN) sia per le aree scientifiche bibliometriche che per le aree NON bibliometriche;
- d. INGLESE (leggere e tradurre il seguente brano): What does "Some Rights Reserved" mean? Copyright grants to creators a bundle of exclusive rights over their creative works, which generally include, at a minimum, the right to reproduce, distribute, display, and make adaptations. The phrase "All Rights Reserved" is often used by owners to indicate that they reserve all of the rights

granted to them under the law. When copyright expires, the work enters the public domain, and the rights holder can no longer stop others from engaging in those activities under copyright, with the exception of moral rights reserved to creators in some jurisdictions.

GRUPPO 4

- a. Descrivere cos'è il processo di Valutazione della Qualità della Ricerca (VQR);
- b. Descrivere cos'è un OPAC;
- c. Descrivere cos'è la Peer-Review;
- d. INGLESE (leggere e tradurre il seguente brano): What do the Creative Commons buttons do? The CC buttons are a shorthand way to convey the basic permissions associated with material offered under CC licenses. Creators and owners who apply CC licenses to their material can download and apply those buttons to communicate to users the permissions granted in advance. When the material is offered online, the buttons should usually link out to the human-readable license deeds (which, in turn, link to the license itself).

GRUPPO 5

- a. Descrivere cos'è il processo di Valutazione della Qualità della Ricerca (VQR);
- b. Illustrare cosa si intende per "Prodotti della ricerca" in ambito bibliometrico;
- c. Descrivere cos'è PUBMED;
- d. INGLESE (leggere e tradurre il seguente brano): May I use the Creative Commons logo and buttons? You may download high resolution versions of the Creative Commons logos and use them in connection with your work or your website, provided you comply with our policies. Among other things, if you use the logos on a website or on your work, you may not alter the logos in any respect—such as by changing the font, the proportions, or the colors. CC's buttons, name, and corporate logo (the "CC" in a circle) are trademarks of Creative Commons. You cannot use them in ways not permitted by our policies unless you first receive express, written permission.

GRUPPO 6

- a. Descrivere cos'è il processo di Valutazione della Qualità della Ricerca (VQR);
- b. Descrivere cos'è l'ORCID;
- c. Descrivere cos'è il JCR;
- d. INGLESE (leggere e tradurre il seguente brano): How do CC licenses operate? CC licenses are operative only when applied to material in which a copyright exists, and even then only when a particular use would otherwise not be permitted by copyright. Note that the latest version of CC licenses also applies to rights similar to copyright. This means that CC license terms and conditions are **not** triggered by uses permitted under any applicable exceptions and limitations to copyright, nor do license terms and conditions apply to elements of a licensed work that are in the public domain.

CL

GRUPPO 7

- a. Descrivere cos'è il processo di Valutazione della Qualità della Ricerca (VQR);
- b. Descrivere cos'è il SJR;
- c. Descrivere cos'è un metadato bibliografico;
- d. INGLESE (leggere e tradurre il seguente brano): Could I use a CC license to share my logo or trademark? Creative Commons does not recommend using a CC license on a logo or trademark. While a logo or trademark can be covered by copyright laws in addition to trademark laws, the special purposes of trademarks make CC licenses an unsuitable mechanism for sharing them in most cases. Generally, logos and trademarks are used to identify the origin of a product or service, or to indicate that it meets a specific standard or quality. Allowing anyone to reuse or modify your logo or trademark as a matter of copyright could result in your inability to limit use of your logo or trademark selectively to accomplish those purposes.

GRUPPO 8

- a. Descrivere cos'è il processo di Valutazione della Qualità della Ricerca (VQR);
- b. Descrivere cos'è l'Open Access;
- c. Descrivere cos'è un DOI;
- d. INGLESE (leggere e tradurre il seguente brano): What happens if I offer my material under a Creative Commons license and someone misuses them? A CC license terminates automatically when its conditions are violated. For example, if a reuser of CC-licensed material does not provide the attribution required when sharing the work, then the user no longer has the right to continue using the material and may be liable for copyright infringement. The license is terminated for the user who violated the license. However, all other users still have a valid license, so long as they are in compliance.

IL PRESIDENTE DELLA COMMISSIONE
Prof.ssa Eleonora LUPPI
