

Miguel Fernandes Moita

Date of Birth: 04/03/1985

Summary

Physics engineer with a 6+ years of experience in research in academic and industrial context. PhD in the field of high energy photon polarimetry for astrophysics. Has experience developing gamma ray instrument simulations, integration, setting up test campaigns on X- and gamma-ray beamlines, leading extensive detector calibrations efforts and data analyses. Experience in product development in the field of analogue sound processing.

Work Experience

Researcher

01/09/2020 – Present

University of Ferrara - *Università degli Studi di Ferrara*

Ferrara, Italy

<http://www.unife.it>

- Working at the LARIX x-ray test facility.

Researcher

01/01/2015 – 21/02/2020

LIP - Experimental High Energy Physics and Associated Instrumentation

Coimbra, Portugal

<http://www.lip.pt/>

- Project future high-energy astrophysics mission proposals based on CdTe multilayer/3D detector technology optimized to perform polarimetric observations on the Compton regime.
- Design, development and test of a dual plane Compton spectro-imager based on 2 CdTe pixelated sensors when used as a scattering polarimeter for high-energy astrophysics. The prototype was tested twice (2017 and 2018) at the European Synchrotron Radiation Facility (ESRF), Grenoble, France, and at the LARIX facility located in the University of Ferrara, Italy, together with a Laue lens prototype. In parallel, a polarimeter prototype mass model simulation code based in the MEGAlib software toolkit was developed and validated.
- Effect of proton irradiation on CdTe detector prototypes. The prototypes were irradiated by proton fluxes at the Instituto de Ciências Nucleares Aplicadas à Saúde (ICNAS) facility.
- Polarimetric simulations for the AMEGO-X mission (MIDEX call, NASA) using MEGAlib toolkit.

Engineer

01/03/2014 – 30/11/2014

GLEXYZ

Lisbon, Portugal

Evaluation of ESA Proposals. Four proposals were made during this period in the fields of mechanical analysis and electronics.

Case Study of Efatec transformers on ANSYS Maxwell.

Engineer

01/03/2012 – 15/01/2014

LusoSpace

Lisbon, Portugal

<http://www.lusospace.com>

- Project OVAN (Óculos de Visão Aumentada com sistema de Navegação), and HIDO (Holographic Integrated Display and Optics). Projects which aim the design of a head-mounted display for space and ground applications.
- Development of two optical setups to record and analyze holographic optical elements.
- Development of a Stereoscopic Head-Mounted Display. System developed made during the master thesis of physics engineering in collaboration with LusoSpace and CEFITEC (FCT/UNL).

Education

PhD in Physics Engineering

01/01/2016 – 21/02/2020

Faculty of Science and Technology, Universidade de Coimbra

Coimbra, Portugal

- Thesis Title: “Polarimeter Development for Future Space Gamma-ray Telescopes”
- Supervisors: Rui Miguel Curado da Silva (LIP-Coimbra/UC); Jorge Manuel Maia Pereira (UBI/LIP-Coimbra)

Master Degree in Physics Engineering

01/09/2010 – 24/04/2013

Faculty of Science and Technology, Universidade Nova de Lisboa

Lisbon, Portugal

Thesis Title: “Design and Development of a Stereoscopic Head-Mounted Display”.
Supervisors: Yuri Nunes (CEFITEC/FCT-UNL); Ivo Vieira (LusoSpace)

Bachelor in Physics Engineering

01/09/2006–07/07/2010

Faculty of Science and Technology, Universidade Nova de Lisboa

Lisbon, Portugal

Personal Skills

Job-related Skills

- Instrumentation.
- X- /gamma ray spectroscopy.
- Polarimetry in the Compton regime.
- Monte Carlo simulation in MEGAlib software.
- Interaction of ions with matter (SRIM/TRIM).
- Optical design (ZEMAX) and optomechanics.
- Data analysis (Matlab, python, Root).
- Analogue and digital electronics, PCB design (Autodesk Eagle) and circuit simulation (NI Multisim).
- Microcontroller programming (Arduino, Microship PIC).
- Mechanical and electromechanical design (AutoCAD, SolidWorks).
- Data Acquisition and interface control (NI LabVIEW).
- Unix systems.
- Handling with workshop tools, CNC machining and circuit soldering.
- Programing (C/C++) .

Other Skills

- Good communication skills for speaking in public, to groups, or via electronic media gained through my experience in conference presentations and working with international research teams.
- Travel passionate. Several travels to countries with different cultures that improved my adaptability, communication and negotiation skills.
- Musician since 5 years old. Instruments played: Piano, Bass and Guitar. Member of several musical groups of different musical styles and people.

Languages

- Portuguese: mother tongue.
- English: proficient user – reading, writing speaking and listening.
- Spanish: basic user – reading, writing speaking and listening.
- Italian: elementary – speaking.
